

OUR PORTFOLIO

Feasibility Studies

We are experts in carrying out total scope of Feasibility studies for Floating solar plants

BESS Consultancy

We are well experts in carrying out total consultancy work for BESS systems including financial modeling

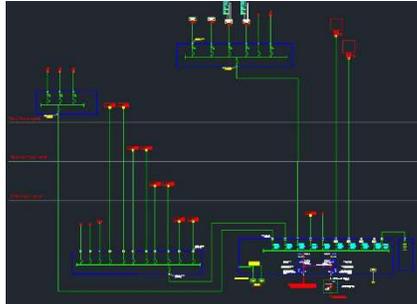

Tr. Line Consultancy

We provide total consultancy work for Tr. Line design works and as well as implementation works

PSS Maintenance

We are experts in Indoor Switchgear Panel Maintenance works including breakdown repair

Electrical System Design Works

We provide total Solution for Electrical System Design Works for HV and LV and ELV Systems

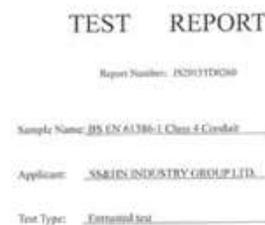

Testing & Commissioning

We are experts in HV and LV Equipment and system testing and commissioning works

Troubleshooting

We are experts in Troubleshooting of Electrical systems with HV, LV, Earthing and Lightning Protection systems

Reporting

We provide Chartered Engineer certification for HV, LV, Earthing and Lightning Protection systems

MEP WORKS

Switchgear Installation

We are experts MV and LV Switchgear panel installation, testings, and commissioning works

Tr. Line Erection

We are experts in Tr. Line erection works with foundation, Tower Erection and stringing works

Outdoor Structures

We are experts in outdoor Gantry structure and Equipment installation works

BESS System Installation

We are experts in total installation works for BESS systems

Solar Plant Installation

We are experts in installation of Ground Mounted solar parks with all the civil works & cabling works.

LV system Installation

We are experts with all the low voltage system installations including wiring, panels, fittings, SA, earthing, etc...

Lightning Protection system installation

We are experts in Lightning protection system installation with earthing systems.

ELV system installation

We are experts in Installation of ELV systems including Data, Telephone, CCTV, Fire Detection systems
